

## Information Sheet

### Brayseal

### Description

The Brayseal bag product is a glue tape system for sealing bags and can be supplied in either permanent or resealable tape. Bags are manufactured in a variety of substrates which include LDPE clear or coloured, cast polypropylene in clear and metalised and co extruded films for opacity. Bags can be plain or printed in up to ten colours. We can offer a variety of conversion features such as air perforations, euroslot, lateral seal, tearline perforation, punched handle and sequential numbers.

See reverse for product guidelines
